

Hemp is being adopted as the best sustainable material by some of the world's largest companies

Premier

Modern Uses of Industrial Hemp

>25,000 uses
across 17
industries

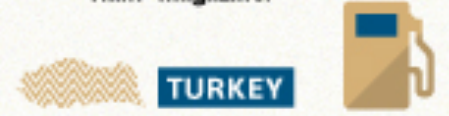

CHINA

China is the **largest exporter of hemp textiles**. The fabrics are of excellent quality.

AUSTRIA

Austria has a hemp industry including production of hemp seed oil, **medicinals** and a 'Hanf' magazine.

TURKEY

Turkey has grown hemp for **2,800 years** for rope, caulking, birdseed, paper and fuel.

GERMANY

Mercedes and BMW use hemp fiber for composites in door panels, dashboards, etc. The Mercedes C-Class has up to **20 kg of hemp** in each car.

ITALY

1,000 acres were planted for fiber in 2002. **Giorgio Armani** grows its own hemp for specialized textiles.

ROMANIA

Romania is the **largest commercial producer of hemp** in Europe.

SLOVENIA

Slovenia grows hemp and manufactures **currency paper**.

CANADA

In 2001, **92 farmers grew 3,250 acres**. A number of Canadian farmers are now growing **organically-certified hemp crops** (6,000 acres in 2003 and 8,500 acres in 2004, yielding almost four million pounds of seed).

UNITED STATES OF AMERICA

The U.S. is the only industrialized nation in the world that **does not recognize the value of industrial hemp** and permit its production.

A Major Industry in 45 Countries

Indian
farmers
already
have a
lot of
hemp!

Imagine creating a whole new industry!

Learning from failures of other crops
